Projects

- **Don't Eat That:** Dietary app that helps users track, create, and edit their recipes, as well as other user recipes
 - **Technology:** React, Redux, Node, Express.js, PostgreSQL, external API's for dietary information
- **News Briefing:** Market news application that is using multiple news API's to present the user with a central location for industry news
 - **Technology:** React, Semantic UI, external news API's
- **Lambda Notes:** Notes application where users can perform CRUD operations with their notes, and communicate with a global back-end API and see everyone's notes
 - **Technology:** React, Node, Express.js, PostgreSQL

EXPERIENCE

Equity Analyst - California State University, Fullerton

May 2016 - May 2017

- Managed performance tracking for the endowment fund
- Conducted financial statement forecasting on multiple companies with information compiled from the Securities Exchange Commission and reconciled models to determine future performance followed by scenario analysis
- Oversaw performance portion of the Investment Team Pitchbook which contained risk management, risk-adjusted and absolute performance, attribution analysis, and top five leaders and laggards
- Composed written buy, sell, and IPO reports and presented them with corresponding valuations

Financial Advisor Intern - Waddell & Reed, Brea CA

February 2016 - May 2016

- Evaluated and presented a variety of investment opportunities including stocks, bonds, mutual funds, exchange-traded funds, and options
- Delivered Edwards Lifesciences buy presentation to Investment Director and Analyst Interns

Independent Bookkeeper - RC Smith Design Build, Fullerton CA

August 2014 - April 2015

- Generated and reconciled financial statements through QuickBooks: balance sheet, income statement, statement of cash flows, and profit & loss statements
- Built Excel templates to analyze working capital accounts, insurance policies, and check distribution

Information Technology Technician - City of Garden Grove, Garden Grove CA

April 2013 - July 2015

- Supported 300 city employees with IT requests
- Collaborated with the IT and Purchasing Departments with new computer and software purchases, then deployed computers and consulted city employees on software migration

Web Designer - Anaheim Automation, Anaheim CA

November 2009 - July 2013

- Revamped entire website including user guides, specification sheets, and photos using vendor and internal data. This provided a fresh, new professional look highlighting precision and quality
- Launched the creation of the photo room for high-quality photography, and created comprehensive folder system on company server for easy access to professional photos
- Generated new marketing ideas to increase website traffic and boost cross-selling after collaborating with the Engineering and Sales Departments
